

MOVING DBS FORWARD

A comprehensive solution from
planning to programming.

PLAN —→ **IMPLANT** —→ **PROGRAM**

Brainlab Elements

Brainlab Elements are efficient, effective, à la carte software modules, serving multiple clinical specialties.

The combination of Elements Stereotaxy, Segmentation and Fibertracking covers all aspects of state-of-the-art stereotactic planning.

Vercise™ DBS Systems

Designed with a patient's comfort in mind, the Vercise DBS Systems offer a compact IPG, smaller, thinner with contoured edges for minimal erosion.

Vercise PC offers a larger battery capacity in a 20% smaller IPG size while Vercise Gevia™ offers a 25-year rechargeable battery longevity.¹

Vercise™ Neural Navigator 2

Vercise Neural Navigator 2 with STIMVIEW™ Technology makes directional programming intuitive and simple.

STIMVIEW Technology shows you the volume of tissue being activated for your selected stimulation settings.

MOVING DBS FORWARD

Excellence in Planning –
Brainlab Elements Stereotaxy

- Seamless workflow with Fibertracking and Segmentation resulting in comprehensive visualization of all relevant structures for well informed trajectory planning
- Intuitive and fast AC/PC definition
- Defined set of Boston Scientific lead model 3D templates available
- Open platform/planning software including support of Leksell frames

Innovation in Mind.
Improvement in Life.

- There is a difference between a directional lead and a directional system.
- The Vercise Cartesia™ Directional Lead is powered by Multiple Independent Current Control (MICC).
- MICC provides precise control of therapy as well as flexibility to adapt to individual physiologies, impedance variabilities, and disease progression.
